What We Do

AForge provides end-to-end solutions that allow U.S. national security operations to better disseminate, access, and maintain the accuracy of mission-critical information. Our end-to-end services cover all your program and mission needs:

- Strategy Development, Advisory, & Consulting
- Systems Engineering & IT Support
- Staff Augmentation & Recruiting Services
- Advanced Research & Development
- IT Software & Hardware Procurement

Skills & Knowledge

Leveraging decades of program experience for the military, intelligence community, and government contract engagements, we have a wide range of capabilities to support your mission:

- Program & Project Management
- Systems Architecture & Engineering
- Organizational Management & Leadership
- Programming Planning & Budgeting
- Operational Planning
- Technology Development & Advancement
- Requirements Development & Management
- Command & Control Operations
- Acquisition Planning & Execution

Who We Serve

We proudly support agencies responsible for national security throughout ground, sea, air, space, and cyber operations.

- › Department of Defense (DoD)
- › Intelligence Community

- › State Department
- › Department of Homeland Security (DHS)

Why Choose AForge?

End-to-End Capabilities

From strategic planning to execution, we enable mission success with complete solutions that start with a clear problem definition and continuously improve.

Years of Relevant Mission Experience

With over 25 years of average mission experience in leadership positions, we know DoD and Intelligence systems from the inside out – helping accelerate approvals and cut through the red tape.

Scalable Talent Acquisition Process

Our network of recruits offers high technical excellence, with plenty of certified and qualified candidates. Regardless of the skill set or experience required, we can get you the talent you need for mission success.

Simplified Vendor Engagement

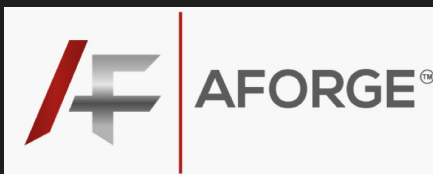

With steep connections and experience navigating the “Iron Triangle of Acquisition,” we can get you access to funding, software, and hardware that meet mission requirements.
